ABOUT ME

A master's student of electrical engineering at TU Berlin with focus on automation and control. A motivated person able to work in multicultural environment and willing to learn something new.

EDUCATION

TU BERLIN (MASTER DEGREE)
2021 - present | Electrical Engineering
- Focus on automation and Control

LEIBNIZ UNIVERSITÄT HANNOVER (BACHELOR DEGREE)
2016 - 2021 | Electrical Engineering and Computer Science
- Focus on automation and Control
- Bachelor Thesis: Comparison of Reachability Analysis Tools for Analog Circuit Verification (1.0)

EXPERIENCE

2021 - present

ICS-NH
- Quality Control Engineer (Werkstudent)

- Controlling and testing of sensor systems and sensors according to EN9100
- Designing sensor systems, such as transducer, in TurboCAD
- Learning to solder electronic components under microscope

2020 - 2021

LEIBNIZ UNIVERSITÄT HANNOVER
in Institute of Microelectronic Systems
- Student Assistant

- Analyzed mixed-signal circuits using reachability analysis (formal verification) in MATLAB
- Created GUI for circuits simulation and verification
- Documented codes

PROJECTS AND AWARDS

International Design Project
2018 | Hanover, Germany
"Peaza Tower"

- Built a plant rack with self-adjusting planks that follow the strongest sunlight direction

2nd Winner in ISWEEEP(International Sustainable World Energy Engineering Environment Project Olympiad)
2013 | Houston, Texas, USA
1st Winner in ISPO(Indonesian Science Project Olympiad)
2013 | Jakarta, Indonesia
"Dynamo Stairs as an Alternative Source of Energy"

- Built a prototype of stairs that produce electricity by using dynamo

INTERESTS

Robotics, Medical Technology, Computer Graphics, Computer Visions, Traveling, Photography, Baking, Video Games
